EXPERIENCE

Lead Developer Junior   2025.02 – Present
Send-Up by Cirrusware

- Mentored developers, performed code reviews, and supported daily problem-solving while remaining hands-on.
- Ensured delivery quality (QCD) and validated releases before client delivery.
- Coordinated with the CTO, led technical meetings, and improved internal development standards.
- Strengthened workflows by introducing best practices and enhancing team communication.

Full-stack developer   2023.02 – 2025.02
Send-Up by Cirrusware

- Delivered a carbon-footprint calculator adopted by multiple agricultural cooperatives.
- Improved overall code quality, documentation, and development standards.
- Led feature development and reinforced internal engineering practices.
- Introduced enhanced Git workflows using CodeCatalyst.

Full-stack developer   2023.01 – 2023.02
Onepoint

- Implemented unit tests using JUnit
- Performed API maintenance and enhancements

Full-stack developer   2022.07 – 2023.01
Welygo (Volunteer work)

- Built a Single Page Application with Next.js.
- Defined the development workflow and validated the project's tech stack.
- Wrote user stories, planned sprints, and structured project delivery.
- Researched and applied up-to-date development best practices.

French Army | Infantry - Operational Unit   2013-2022
French Ministry of Defence

- Led teams in high-pressure environments with strong discipline and teamwork.
- Built solid leadership, resilience, and problem-solving skills.
- Experienced in coordination, training, and operational procedures.
- Carry forward values of loyalty, responsibility, and team support into software engineering.
